

Our military products are modified to meet specific MIL Specs and can be highly customized versions of our standard COTS products. They are deployed on aircraft, naval surface ships, military vehicles, UAS/UAV ground stations and Coast Guard Cutters. They are installed stand alone, in racks or in transport cases, and more. These deployments are in harsh conditions ranging from extreme cold to extreme heat, high humidity, and water exposure and also subjected to harsh shock and vibration.

These products offer the military and government contractors inexpensive equipment that is built to withstand everyday use by field personnel. Even though the products are categorized as COTS (Commercial Off The Shelf) we use long life cycle industrial grade components with long-term availability so they will not be obsolete by the time your project hits the field and this affords years of spares availability.

Quite often our users have trouble meeting all the requirements in one unit from one supplier. Since we design, engineer and manufacture our own products, we can affordably customize them to your exact requirements...or in some cases, design a product from the ground up.

NLS has worked extensively with the following military programs and contractors:

- **JDISS** Joint Deployable Intelligence Support System
- **JWICS** Joint Worldwide Intelligence Communications Systems
- **JIC** Joint Intelligence Center
- **USCG TISCOM** Telecommunications & Information Systems Command
- **USSOC** United States Special Operations Command
- **AIA** Air Intelligence Agency
- **US Army RDECOMM** Research, Development and Engineering Command
- **USAAMCOM** US Army Aviation and Missile Command
- **THAAD** Theatre High Altitude Area Defense Missile System
- **MDA** - Missile Defense Agency
- **USCG Deepwater**
- **JHSV** – Joint High Speed Vessels
- **DCGS-N** – Distributed Common Ground System - Navy
- Littoral Combat Ships, Zumwalt DDG/X, Aegis

NLS Capabilities

NLS designs, engineers and manufactures all the products we offer. This means if you cannot find exactly what you are looking for, we can make it for you! Whether it is a modification of an existing product or a brand new design built around your specifications, you can get what you want.

In addition to designing, engineering and manufacturing all the products we offer, NLS has the ability to build to a range of specifications and can pre-certify products via our authorized testing facilities. These specifications include:

901D
461F

167
810

TEMPEST
NEBS

NEMA

NLS Deployments

NLS products have been deployed in the following items:

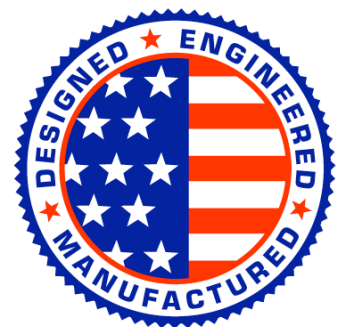

Aircraft Carriers
Destroyers
Amphibious Assault Ships
Aegis Ships

Guided Cruisers
KC-135s
C-130s
Coast Guard Cutters

Humvees
Various Transport Cases
UAV Ground Stations
Submarines

NLS Information

All products offered by NLS are manufactured in Camarillo, CA, U.S.A.
NLS is a Small, Woman-Owned Business
Cage Code is 1L5F5
ITAR Restrictions: None
ECCN: EAR99
